*The inheritance of interest in physics?
3rd cousins, 3 times removed*

$$ds^2 = (1 - 2M/r + Q^2/r^2) dt^2 - dr^2 / (1 - 2M/r + Q^2/r^2) - r^2 d\Omega^2$$

(The Reissner-Nordström metric)

Maybe it takes two to make a theoretical physicist?

3rd cousin, once removed?

Dr Alex Kalloniatis

University of Adelaide, Australia

Research area: Theoretical Physics

Research interests

- * Analytic methods in nonperturbative quantum field theory*
- * Applications of the domain model to the phenomenology of hadrons*
